

Islington Station – Easier Access Project & Station Redevelopment

Timeline: Starting Spring 2023

Content/timeline accurate at time of printing

What we are doing and why

TTC's Easier Access Program will make subway stations accessible to everyone. In spring 2023, work will start at Islington Station to create a barrier-free path from street level to subway platform level in 2024. In addition to accessibility, Islington Station is slated to be completely rebuilt, with an entirely new bus terminal featuring plenty of natural light and accessible bus platforms.

The station improvements will include:

- Two new elevators which will connect customers between the Passenger Pick Up/Drop Off area (PPUDO), concourse level and subway platform at the station.
- Direct pedestrian access via an accessible ramp located at the main West entrance.
- Improved wayfinding signage throughout the station.
- A temporary accessible bus terminal which will begin service in 2024 and a new permanent accessible bus terminal, which will be completed in 2026.

Expected work activities

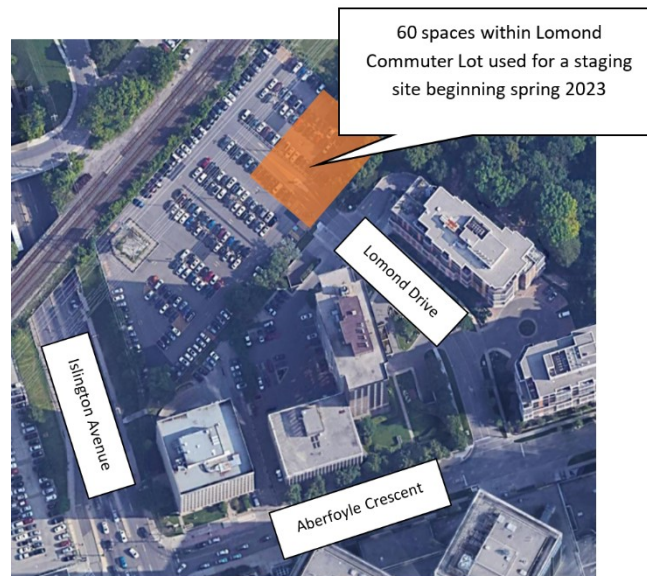

The first major phase of work will include shoring and excavation activities for the new elevator shafts within the existing station.

Project Timeline:

- **Spring 2023:** Elevator construction will begin on the concourse and subway platforms.
- **Fall 2023:** Construction will begin of a temporary accessible bus terminal to replace the existing bus terminal on the west side of the existing station.
- **Winter 2024:** Islington Station will be fully accessible with completion of two new elevators and a temporary accessible bus terminal.
- **Fall 2026:** Completion of a new permanent accessible bus terminal at Islington Station.

Traffic and pedestrian details

- The existing Lomond Commuter Lot will be used as a staging area beginning in spring 2023, until winter 2024. This work will temporarily impact 60 parking spaces.
 - The Lomond Commuter Lot will have 170 permanent parking spaces remaining during construction. All parking at this lot will be restored following construction.

Work hours

Work will take place Monday to Friday between 7 a.m. and 7 p.m. Some weekend work may be required to maintain schedule.

TTC service

Access to the station and subway platforms will be maintained throughout construction. Bus service will be maintained throughout construction at the temporary accessible bus platform.

Thank you for your patience as we work to make Islington Station accessible. An updated notice will be issued prior to construction. A project webpage is available at www.ttc.ca/projects.
